Vision

Connect professional expertise of NRVs back to villages, for sustainable rural development

Mission: Empower rural students, youth, women self help groups to make full use of opportunities in education, employment and entrepreneurship, through professional guidance from Non-Resident Villagers (NRVs). Raise standards of living in villages.

Why NRV? - Professional guidance/support is more powerful than funding

65% of India, rural, feeds basic/essential needs of country.

Rural India deserves more attention and professional support.

2011 Statistics	Rural
Poverty	25.70%
Child Mortality	54.70%
Literacy - Female	57.95%
Literacy - Male	77.15%

1. We struggled and our juniors also struggling: Though many students and youth at rural are highly talented, due lack of awareness and professional guidance, they are not able to fully utilize opportunities in education employment and entrepreneurship.

2. Limitations of Govt./NGOs Support: Number of Govt. officers or NGO volunteers who can EXCLUSIVELY focus a given village has the limit. Whereas in each village, hundreds of NRVs are there who carry expertise in diversified domains and technologies.

3. No platform to project expertise of each NRV: Good percentage of NRVs are in senior positions in various domains/technologies. However a simple/quick platform is missing to know their profession, specialization and association with social orgs. Hence villagers are not able to approach NRVs for specific professional support. This data will also help NRVs to converge.

4. Lack of flexibility to support in interested area: NRVs have intentions to support their village. How to move forward and integrity are the challenges. There is no platform projecting current needs of village, leading to random support or withdrawal after some time.

NRV Model
